GALVESTON, Tex., March 11 .- The ball game here yesterday was about as a criterion of a team's ability as be imagined. The Nationals note the Texas leaguers of Galveston 12 to 3, but the score might just as well

Goodwin twirled the first three rounds for Washington and did well. He has been in Houston for a month or so and has been pitching pretty regularly, but not to batters. He showed this by giving two passes and smiting Cermack in the ribs with great force and en-thuslasm and an inshoot. He was the one of the three twirlers who tried to show any speed, and he has quite a

On his list is a tedious teaser that sails languidly toward the plate and sometimes almost | Spirit Is Genuine. reaches it. A man would have to have a pole to get near this particular ball, t the Galveston players did not realize that and tried to turn a trick with reguation length bats. He fanned only one man, but nearly all who faced him fell at least once for his delayed delivery.

Wilson is a likely youngster of great size. He is out of condition and did not exert himself in any way, hence the three runs that were made off him. An estimate of his qualities will have to come later.

Lave Cross said at the supper table last night that he had handled a baseball but once since the 1906 season closed. That was when he removed three from one trunk to another. Yet the seed one was as spry yesterday as if it had been midsummer. He is a wonderful athlete, with perfect control of himself at all times, and not once yesterday did he fail to make the right play or forget that it would not do to strain himself by difficult throws; yet he started a double play in the eighth round with three men on bases that caught a runner at the plate and least in the early weeks of the race.

The Galveston ball park is a new one, built his year, and is rather small, but Hickman's homer yesterday with three con bases was no baby bunt. The left field fence is twelve feet high, topped by six feet of wire netting. The ball went over half way between second and third and was considerably above the cighteen feet of obstruction. The next longest hit of the game would not have hit the fence at the same place three from one trunk to another. Yet the seed one was as spry yesterday as if it had been midsummer. Elaakenship and Graham are two men on whom Cantillon counts to make good. He has had his eye on them for some time and predicts that they will wear Washington uniforms all season. From their form yesterday his confidence would seem to be justified.

Blankenship is tall, gets over the ground with great speed, and showed no signs of losing his head. and as busy as if he had been playing dulging in baseball practice is real for a championship. All he will need this season will be an improvement in his batting and he cannot see why that should not be on hand when the bell state of the season will be an improvement in his batting and he cannot see why that should not be on hand when the bell and the players have taken advantaged.

One thing is certain: So far, the men One thing is certain: So far, the men like Cantillon and also have confidence in him. There is more of the spirit of this being a real major league bell team than there has been before for three years. The players do not feel that their club is merely a pawn to fill out a schedule, but is an active factor, which, while it may not win the pennant or even do better than last year, is an organization with which the leaders in the race will have to reckon serirs in the race will have to reckon seri

That spirit is not artificial, but genuine and will prove lasting. Also the pub-lic is inclined to take the same view and the whole attitude of players and fans at American League Park in Wash ington seems destined to undergo great change at least in the early week

Perrine Make Favorable Impression.

Perrine made a favorable impression at short. He is quick and reliable in judging the force with which a ball will come to him. This is not such an easy task down here. The diamond is all sand, and a ball striking the ground stops like a favorite owned by a bookmaker. There is no chance to lie back, wait for the bound, and make a quick whrow. You have to be ready to move forward and make a pick-up that may require an underhand snap. While Perrine did not risk his arm by snaps, he was sharp enough to always land his man at first.

Cantillon Is no fancy manager. He leaves all the heavy epistolatory work to Willy Fowler, the treasurer, while he himself goes forth and gets his muscles sore so that he can be in full sympathy with his aching henchmen. He was on the coaching lines and the job yesterday with a borrowed uniform and a loud voice. He says this will be his characteristic style this summer, and he will be part and parcel of the playing outfit.

The value of S. S. S. as a blood purifier has been thoroughly proven by its forty years of successful service in the treatment of blood and skin diseases of every character. It is the best known and most generally used blood medicine on the market today, because in the forty years of its existence it has not disappointed those who have used it, and as a result of its universal success in curing disease it has made friends EVERY-WHERE. It has been on the market for forty years, and its record in that time is one of which we are justly proud—it is a record of forty years of cures. As a remedy for Rheumatism, Catarrh, Scrofula, Sores and Ulcers, Skin Diseases, Contagious Blood Poison and all diseases arising from an impure or poisoned condition of the blood, S. S. has no equal It goes into the circulation and thoroughly cleanses it of all impurities and makes a complete and lasting cure of these troubles and disorders. It furnishes to weak, polluted blood, rich, health-giving and health-sustaining qualities, and as this pure, fresh stream circulates through the system, all parts of the body are invigorated and made strong and healthy. S. S. S. is the only blood medicine on the market that can claim acsolute freedom from minerals in any form. This great medicine is the product of nature's forests and fields, and is made from the healing, cleansing juices and extracts of roots, herbs and barks. It is, therefore, in addition to being a certain cure for blood troubles, an absolutely safe medicine for young or old. It is not an experiment to use S. S. S.;
